# What our customers have to say!

**Whaling Poultry Farm Ltd., Mike Whaling**  
**72' x 140' Equipment Storage with 30' x 18' & 40' x 18' overhead door**

"I have never had a place to work in like this before. The light is wonderful even on a dull day. With the height of the building we can stand on top of the equipment and work. The local dealer was great to work with. We should have built it years ago." Mike Whaling

**Can Grow Crop Solutions, Ray McDonald**  
**40' x 84' Storage Building**

"The fabric covered building is exactly what we needed for storage. It is a very efficient way to light the building and the high ceiling that the building provides is perfect for stacking our products. Also, the wood sides on the building provides us with low maintenance. Our local dealer was fast and efficient and very professional to work with and they left the job site looking clean" Mike, Can Grow Crop Solutions

**Kenda and Henry TePlate**

**65' x 210' Dairy Freestall building with attached milkhouse**

"We love the brightness and the air quality that the fabric building provides. There is no smell. The 3' eave is amazing and the rain never gets in, even with wind. We have an automatic curtain and vents in the building, no fans are needed. Overall, we are very happy with the building and we would highly recommend this type of structure to anyone." Kenda & Henry TePlate

\*Buildings were constructed by dealers representing BriteSpan
