# BRITESPAN BUILDING SERIES

BUILDING SYSTEMS *"Our strengths are by design, our value is under the cover"*

## BRITESPAN Building Components

BRITESPAN Building Systems have been designed with unique components that enhance the durability and strength of the building.

## Trusses Hot Dip Galvanized Covers

BRITESPAN Building Systems Trusses are coated by Hot Dip Galvanizing (HDG). Every area of a HDG part is protected, both inside and out. No other coating can provide the level of protection achieved by hot dip galvanizing.

BRITESPAN Building Systems Synergy Covers are constructed from a 12.5 oz fabric that is available in a variety of colours. The fabric is a double stacked weave which provides tremendous rip and tear resistance. The Synergy and Synergy FR covers are backed by a 16 year and a 10 year pro rata warranty.

\* Colours may not be exactly as shown, contact your local dealer to see fabric samples

## BRITESPAN can customize your building to suit needs
